### Centennial Park:

- Barnes met with engineer after walking Centennial Park and noticing erosion. Will have engineer examine and determine remediation.
- Barnes while at the park noticed that the bathroom needs to be replaced. Need to have the engineer determine how the facility can be updated and if there are floodplain issues. The same engineer that analyzes the stream erosion should be able to analyze the floodplain issue.
- Barnes is considering a bridge to take heavy equipment across Richland Creek to be able to improve the urban forest and trails.
- Additional trail improvements to mitigate erosion and increase distance of walking trails
- Board feels that we need to repair the existing trails, but that first priority is to make sure the Creek is stable or else the other suggested improvements are not possible.
